

Whats new in the Detail View Editor (DVE)?

Introduction

We have completely improved our Detail View. It even has a new name: Detail View Editor. To allow you even more fast and easy editing of all issues we've added a lot of new functions. This page provides you a detailed overview of all new Detail View Editor functions.

 - [New Column Selector and Layouts](#)
 - [Search Box](#)
 - [Edit, copy and paste](#)
 - [Send To Function](#)

Detail View Editor Layout

To give you a better overview of all functions the Detail View Editor offers, we have divided it into nine areas. Every area has its own purpose.

1. Logo and Title: The title depends on where you open the Detail View Editor. It also defines the default layout. The source can either be a progressbar or a JQL expression.
2. Search Area: We have added a search bar for contextual searching. More search functions will be added in the future.
3. Dialogue controls: There are two basic ones: full screen and reload.
4. Row controls: You can collapse and expand your issues or use our predefined filters.
5. Column controls: Create your layouts with our column chooser, save them for your team and edit them whenever you like.
6. Edit area: Excel like overview and editor for all your issue data.
7. SendTo Area: You can easily send your filtered issues to different tools. Detailed list down below.
8. Info area: Not relevant for this release. More functions will be added here in the future.
9. Just the close button.

New Features

New Column Selector and Layouts

You can now easily add, remove and rearrange all columns. Add any system and custom field to your view with our new column selector. For easily finding your fields, we've included a search bar. When you're done with your layout, you can save it for later or as global for your whole team to see.

Summary	Status	Time	Original esti...	Remaining Es...	Time Spent	Timebudget
ESS-20 Customer project #46	TO DO	<input type="text" value=""/>	4d	0	0	1w
ESS-23 Project Organisation	TO DO		1h	1h	0	
ESS-22 Project Content Story B	IN PROGRESS		0	0	0	
ESS-21 Project Content Story A	TO DO		0	0	0	
ESS-16 Project Organisation	TO DO	<input type="text" value=""/>	6h	4h	4h	
ESS-12 Project Settings	IN PROGRESS		1h	50m	10m	
ESS-11 Project Content	IN PROGRESS		0	0	30m	

You can find more information in the [documentation for the column selector](#) or the [documentation for layouts](#).

Column Sort and Filter

All columns can be sorted or filtered in Excel style.

Summary	Status	Time
> ESS-20 Customer project #46	TO DO	<input type="text" value=""/>

You can find more information in the [documentation](#).

Search Box

You can type in any value and the Detail View Editor will automatically show you all results. The search includes every text based field.

Summary	Status	Time	Original esti...	Remaining L...	Time Spent	Timebudget
ESS-20 Customer project #46	TO DO		4d	0	0	1w
ESS-22 Project Content Story B	IN PROGRESS		0	0	0

ESS-19 Project Budget-Planning	TO DO		0	0	0	

You can find more information in the [documentation](#).

Edit, copy and paste

You can edit any field with a double click. A single click selects a field. Use a right click or shortcuts to easily copy and paste any value. As this works with your system clipboard you can also copy and paste values from other tools.

Send To Function

When you're done editing, you can send your filtered issue list to a range of different tools. We offer a list of different targets and plan on expanding them in the future.

- Display in Issue Navigator
- Timesheet View included in Epic Sum Up
- Export as CSV
- Export as Excel
- Tempo Timesheet by Tempo
- Timetracker by EverIT
