

# Release 2.1

## General Information

Cloud 2.1 adds a few extras to the major cloud version 2.0. Mostly new Detail View Editor Features that are also included in Epic Sum Up Server/Data Center 3.8.

## Detail View Editor

With 2.0 we added new editable fields that were up until now only accessible on Server and Data Center (1). New copy and paste functions for the Detail View Editor that exist since Epic Sum Up Server and Data Center 3.8 are now also available for Cloud (2). Have a look at our 'What's new sheet' to learn about all Detail View Editor features. Or switch to your Jira instance, open the Detail View and take our small on-boarding tour.

The screenshot displays the Epic Sum Up Time application interface. At the top left is the 'Time' logo. A search bar is located at the top right. Below the search bar is a 'Default Layout' dropdown menu. The main area contains a table with columns: Summary, Status, Time, Original..., Remaini..., and Time Sp... The table lists several tasks, including 'Customer project', 'First Grooming', 'Define filters', 'Testing', 'Roll out', 'Send out order cor', and 'write invoice after'. A context menu is open over the 'ESUS-24 Define filters' row, showing options: 'Copy' (Ctrl+C), 'Copy with Headers', and 'Paste' (Ctrl+V). On the right side, a 'Columns' panel is open, showing a list of fields with checkboxes. A purple circle with the number '1' is placed over the 'Status' checkbox, and another purple circle with the number '2' is placed over the 'Copy' option in the context menu. At the bottom, there is an 'Export' button and a 'Do you need help?' link.

Summary	Status	Time	Original...	Remaini...	Time Sp...	...
ESUS-17 Customer project	DONE	■	2h	0h	2h	...
